About This Game

There are more ways to race than ever before in NASCAR Heat 3! Jump into the enhanced Career Mode, where you can build your own race team and compete in the all-new Xtreme Dirt Tour. Prove that you are the best racer in the world in the all new Online Tournaments feature. At-track stories now mean that anything can happen on race day, just like in real-life! Plus, all your favorites are back and better than ever, including Split Screen, Challenge, Championship, 40-player online, and more.

Buckle up! NASCAR HEAT 3 is the racing game you've been waiting for!

- Xtreme Dirt Tour - In addition to the 3 NASCAR National Series (NASCAR Camping World Truck Series, NASCAR XFINITY Series, and Monster Energy NASCAR Cup Series), players can sling some mud in this all-new dirt fantasy series.
- Online Tournaments - Compete against others from across the globe in daily and weekly tournaments. Lay down a great race time and qualify for the Finals in your skill bracket. Win your bracket for ultimate bragging rights.
- 8 New Tracks - 8 all-new dirt tracks, including dirt racing at Bristol Motor Speedway and NASCAR Heat's first ever dirt road course. The final Charlotte Roval layout and the overhauled ISM (formerly Phoenix) Raceway have also been added.
- Deeper Career Mode – Make a name for yourself in the all-new Xtreme Dirt Tour and advance to NASCAR's 3 National Series. Sign contracts with some of the biggest teams in NASCAR or start your own team, build your own staff, and see if you can bring home the Monster Energy NASCAR Cup Series Championship.
- Stories – Before the green flag waves, get live-updates on your race. Watch as a driver gets sent to the back for a technical violation. Get updates on who's having a good weekend, and who's struggling.

-
- Racing Line – Practice now includes a racing line that gives real-time feedback on the optimal line and speed to run at your current track.
 - AI Enhancements – AI pit behavior has been revamped. AI difficulty has also been tuned to provide a challenge to players off all skill levels.
 - Pre-Made Car Setups – For those who want a faster car, but don't like tuning in the garage, NASCAR Heat now offers 9 pre-defined car setups, including 3 loose and 3 tight setups.
 - Plus, so much more...

Useless with a steering wheel , shifter doesnt works th8rs, clutch doesn't work t300 , t500, and tx

Major problem wheel doesnt center at start of a rolling start so you dart off and wreck at green flag.

Had high hopes., purchased 4 copies

. IF YOU DONT HAVE AN XBOX CONTROLLER YOU CANT PLAY IT CAUSE I DOWNLOADED THIS GAME AND WAS VERY EXCITED TILL I FOUND OUT THAT YOU NEED AN XBOX CONTROLLER TO PLAY WITH, I TRIED MY PS4 CONTROLLER BUT THAT DIDNT WORK.. Same old junk, different year. They are improving, there is no doubt about that. Problem is, they need to improve the core of their game before anything else. This horrific game engine is killing them. Horrible wheel support is killing them. I get that they're catering to the console crowd first, but come on. Refunded this game just like the one from last year. Fix your core mechanics and then maybe I'll take another look. Until then, the winning combination of iRacing for online and NR2003 for some AI fun.. I was iffy due to the mixed reviews but this is amazing. raise hell praise dale ♥♥♥♥ danica patrick 'merica god bless y'all have fun highly recommended. its a good game to play with my friends. i played it for a little bit and thought it was rather good. soon realised how boring this game actually is. if you want a racing game go for forza or grand turismo as their better designed games and less repetative racing. Did not work o my platform. I've bought all 3 iterations... Summary:

Crap. The physics model is one of THE worst I've ever seen. Who made the concious decision to make the AI almost impossible to move all the while making your car get loose by simply being tapped? He should be fired. NASCAR needs to actually care about the games imitating their product on the track.

Next year:

- Make a more realistic driving model, similar to how Codemasters does it. I don't need super realism, but I do need a game to actually make sense.
- Paint booth... Stop ripping off customers with your DLC. The cosmetics of this game is the last thing I'm going to pay for when the graphics aren't even AAA.
- Career mode is better but please allow the ability to skip a race. It's either you compete in all races or none (not okay).

Game has improved in a lot of ways, but it fails in so many others.. i played it for a little bit and thought it was rather good. soon realised how boring this game actually is. if you want a racing game go for forza or grand turismo as their better designed games and less repetative racing

Dirt 2 Daytona 2. I'd give this a go based on fun factor , short load times and improvements over last version , Note - I had to turn off vsync to get stable framerates on this build using core i5 / 1080ti .. The worst PC game I've ever played. Please don't ever touch this. Need for Speed: Underground has better physics than this dumpster fire.. they dont have 1 simple thing.... KEYBOARD AND MOUSE SUPPORT. would love to try and race online but never can :(no lobbys ever. A solid arcade-type racer for NASCAR. Legend difficulty can be unforgiving. 6/10. If you like NASCAR this is an easy purchase and you will enjoy it. The AI is solid, and the physics are solid. I have no complaints. Plus Hailie Deegan in Career mode. Easy recommendation.. Not bad, im genuinely pleased. Havent had this much fun with a NASCAR game before.. If you're a real fan of NASCAR then purchase this game. This game is GOOD !! I'm trying to understand how people can't see all of the little details in this game. The AI is damn good better than most humans I've raced. You have cautions guys ! What game gets cautions right ? You have every track. You have every driver. All 3 top series. Tons of options for settings. Stages, difficulty, length of race.

This isn't iRacing guys. iRacing is a niche racing experience. Its not trying to please a wide audience. Besides if you were to get all of the content included in this game (tracks, different series cars, not counting no official paint schemes) on iRacing you would be talking hundreds of dollars. Not counting the subscription fee.

Oh and I'm using a Thrustmaster T300GT w/ pedals and it works flawlessly. Make sure to adjust your degree of rotation and force feedback. FFB default strength is kind of weak. I've also tried Xbox One controller, that too works perfectly.

I'm not going to go into detail on every aspect of the game but as a fan of NASCAR, this game represents the sport I love pretty well. I truly believe 704 has done a great job of progressively making a pretty awesome game for a motorsport that really didn't have one at all.
